

REMOTE CONTROLLED VACUUM TRUCK HOSE REEL

- . Clean hose trays; less odor - higher company profile
- . Happier - safer - more productive operator

Mounts on any pumper truck

- Steel or aluminum tank;
- Dump or non dumping tank;
- No welding required on tank or frame;
- Reel swings away to dump tank or to swing back door open; (90°)
- Capacity - 300 feet of 3 inch vacuum hose.

Plug and play installation

- NO hydraulic valves, pumps, lines or PTO required;
- Electro-hydraulic operation- reel in and out - swing open and closed;
- Wireless remote control - 300 ft range; (Safety wired remote included)
- Only 2 wires to connect on truck batteries
- Bolts directly on truck frame - designed to be retro-fit.

Increased safety

- Reduced compensation and back type injuries;
- Reduced operator fatigue, "manhandling" hoses eliminated;
- Reduced operator contact with mud and hazardous material;
- Reduced spills and leaks at customer locations;
- Reduced accidents with back-up camera option.

Job set up time in seconds – not minutes

- Remote control hose deployment;
- Reel unwinds hose to operator at walking speed;
- No operator fatigue / back issues / lifting / dragging hoses;
- Power swing offers 90° degrees of direct access to job site in seconds.

• 50 SECONDS TO DEPLOY HOSE

- 5... Unlock reel from transport mode;
- 5... Power swing to optimum angle;
- 30... Grab hose, press "unwind" on remote;
[Start walking to job site]
- 10... Couple hose to truck vacuum valve.

• 55 SECONDS STOW HOSE

- 5... Uncouple hose from valve to secure on reel;
- 30... Press button on remote to wind hose;
- 10... Secure end on reel, power swing close;
- 10... Engage swing transport safety pin.

- . Wireless Remote Control
- . 300 ft range, weather-proof

Solid Return on Investment. Increased Production, Safety and Profile.

Labor savings:

12 minutes per job (minimum)

Jobs per week (at 5/day):

25

Hours of labor saved per week:

5.0 hours

Hours of labor saved per year:

260 hours or 32.5 days

***Not including the benefits of:** Superior operator comfort; increased employee health & safety; cleanliness; and lower wear and tear on hoses. Increase your visibility in the market. Improve job-site safety with wireless, color back-up camera option. Reduce employee turnover.

Simple installation.
No welding or hydraulics required.
Easily transferred from
old trucks to new fleet units.
Could be retrofit on any trucks

Standard features (remote control model)

High quality carbon steel or stainless, construction

CAD Design and stress-analyzed

Sand blasted, primed and painted in house ensures quality control

Powered reel in and reel out - as well as - power swing open and close

Remote control operation for all functions

Power swing away frame allows vacuum tank door to open and raise tank to dump

Safety latch

Safety hose guards

Safety system start - ignition on to start

Capacity - **300** feet of 3 inch hose (HOSE NOT INCLUDED)

Color; **Standard** black wheel or custom paint. **Galvanised** arm Standard

Wireless back-up color camera and cab screen (plug and play) option

12 Volts Hydraulic power pack mounted on bumper. Aluminium cabinet

Galvanised carbon steel Bumper
